20 July 2011

Dear Sir/ Madam,

Innovation and developments in scientific medical research and technology has changed the landscape of healthcare delivery and systems. These developments can only be realized by instituting appropriate management and administrative processes, needless to say the policy frameworks. The healthcare administrators find it challenging to practice effective methods to meet the ever-increasing demand for healthcare services with perpetually scarce resources. To equip the healthcare leaders, entrusted with responsibility to plan and implement the healthcare policies and programmes with up-to-date management aptitude, it is imperative to undergo a Management Development Programme specific to the present healthcare scenario.

A "Healthcare Executive Management Development Programme" (HxMDP) is envisioned by the Department of Hospital Administration, All India Institute of Medical Sciences, New Delhi to exclusively address and equip the doctors with a cumulative medical experience of 15 to 20 years and are presently occupying senior and middle management positions in healthcare institutions in India and South-East Asian region. The programme is being conducted in collaboration with the World Health Organisation.

Seven programmes have been successful conducted since 2007, in which Vice Chancellors of the Universities; Directors & Medical Superintendents of large hospitals; Deans & Principals of Medical Colleges; and several Senior Health Officers of Govt. of India and South-East Asian region have participated and enriched their understanding of modern healthcare management practices and its application.

The Eighth programme in the HxMDP series is scheduled to be held from 11 to 16 September 2011 at Cidade-de-Goa, Goa, India. I take this opportunity to request you to nominate Senior Doctors heading hospitals and healthcare services, to participate in this programme. I am sure this six-day programme will open newer vistas in the understanding of managing healthcare facilities and hospitals that will be of immense value to your organisation.

The nominal programme registration fee is INR 38,500/- (Twin sharing) / INR 58,500/- (Single occupancy) per participant. The fee includes course material, accommodation, all meals and airport transfers in Goa. The fee can be paid by demand draft drawn in favour "Department of Hospital Administration, AIIMS, A/c HxMDP" payable at New Delhi or using wire transfer. For more details, visit www.aiimshospadm.ac.in/hxmdp. The programme capacity is 30 participants only, on first-come-first-serve basis.

Looking forward for nominations from your organisation !

With warm regards,

Yours Sincerely

(Dr Shakti Kumar Gupta)
