CHAPTER 4. PROJECT PROFILE & BACKGROUND INFORMATION

I. Objectives

The key objectives to be achieved through this procurement are to provide services under NMHP, QA, RBSK and AAM:

- As per the mandate given by GoI, by 2022 all SHCs have to be converted into Ayushman Arogya Mandirs (AAMs) to provide Comprehensive Primary Health Care (CPHC) through AAMs.
- Reduce the time for various entries to be done regarding reporting of AAMs in CPHC portal as it could be possible to do entries on the go.
- Indian healthcare delivery system has come a long way in providing primary, preventive and curative health care with its three tier system of primary health centre, secondary level health centre and tertiary level health care. Access and fulfillment of healthcare in rural areas is still inadequate in spite of all efforts by national health mission.
- The biggest challenge is lack of medical human resource- doctors and specialists in rural areas, inadequate capacities of the doctors/ mid-level providers in the PHCs/AAMs and lack of organized continuum of care. There is also the problem of prescription and dispensing of drugs in rural areas. The above challenges can be reasonably addressed by utilizing information technology in delivering healthcare services. The Ayushman Bharat has provided an opportunity to address the health care through the platform of Ayushman Bharat Ayushman Arogya Mandirs (AB-AAM) through Telemedicine approach in Hub and Spoke Model.
- To link health record of patient with his / her unique identity and provide EHR across the state of Rajasthan, State has developed a patient centric system (IHMS/HMIS) which is functional at Government Health Institutions. IT equipments will help hospitals to feed/ digitize the information/ help in teleconsultations etc.

III. Brief Description of AAMs

a. National Health Mission (NHM), the country's flagship health systems strengthening programme, particularly for primary and secondary health care envisages "attainment of universal access to equitable, affordable and quality health care which is accountable and responsive to the needs of people". Investments during the life of the NHM in its earlier phases were targeted to strengthen Reproductive and Child Health (RCH) services and contain the increasing burden of communicable diseases such as Tuberculosis, HIV/AIDS and vector borne diseases. While such a focus on selective primary health care interventions, enabled improvements in key indicators related to RCH and select communicable diseases, the range of services delivered at the primary care level did not consider increasing disease burden and rising costs of care on account of chronic diseases.

b. National Sample Survey estimates for the period-2004 to 2014 show a 10% increase in households facing catastrophic healthcare expenditures. This could be attributed to the fact that private sector remains the major provider of health services in the country and caters to over 75% and 62% of outpatient and in-patient care respectively. India is also witnessing an epidemiological and demographic transition, where non-communicable diseases such as cardiovascular diseases, diabetes, cancer, respiratory, and other chronic diseases, account for over 60% of total mortality.

c. There is global evidence that Primary Health Care is critical to improving health outcomes. It has an important role in the primary and secondary prevention of several disease conditions, including non-communicable diseases. The provision of Comprehensive Primary Health Care reduces morbidity and mortality at much lower costs and significantly reduces the need for secondary and tertiary care. For primary health care to be comprehensive, it needs to span preventive, promotive, curative, rehabilitative and palliative aspects of care. Primary Health Care goes beyond first contact care, and is expected to mediate a two-way referral support to higher-level facilities (from first level care provider through specialist care and back) and ensure follow up support for individual and population health interventions.

d. In India, the need for and emphasis on strengthening Primary Health Care was firstly articulated in the Bhore Committee Report 1946 and subsequently in the First and Second National Health policy statements (1983 and 2002). India is also a signatory to the Alma Ata declaration for Health for All in 1978. The Twelfth Five Year Plan Identified Universal Health Coverage as a key goal and based on the recommendations of the High- Level Expert Group Report on UHC had called for 70% budgetary allocation to Primary Health Care in pursuit of UHC for India.

e. The National Health Policy, 2017 recommended strengthening the delivery of Primary Health Care, through establishment of "Ayushman Arogya Mandirs" as the platform to deliver Comprehensive Primary Health Care and called for a commitment of two thirds of the health budget to primary health care. In February 2018, the Government of India announced that 1,50,000 Health & Wellness Centers (HWCs/AAMs) would be created by transforming existing Sub Health Centers and Primary Health Centers to deliver Comprehensive Primary Health Care and declared this as one of the two components of Ayushman Bharat. This was the first step in the conversion of policy articulations to a budgetary commitment.
